

The Federal Communications Commission

Dear The Federal Communications Commission,

Right now to show you how corrupt your are:
I amke about one long distance call a month, for less than 10 minutes.
This means the tax for each month's use of long distance is several 100s of percent for me as the tax bill is many times the usage bill, adn for what?
Nothing!
Keep your hands out of my pockets! Empty your own first.

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

kerry unger
